DETAILED ACTION

Status of Claims

Claims 31-61 are pending in this application.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claim in the subject matter which the applicant regards as his invention.

Claims 31-61 are rejected under 35 USC § 112 second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The expressions "general", "and/or", "may be", "can be", "as well as" and "may contain" place no definite limits or boundaries on the claims. The rejection with respect to "may be" could be overcome by changing it to is the same or different. The superfluous term "general" must be deleted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 31-61 are rejected under 35 U.S.C 102 (e) as being anticipated by Ognyanov et al, cited. Applicant claims a compound of formula 1, wherein R^1 to R^7 are independently selected from H, optionally substituted alkyl, alkenyl, alkynyl, aryl, heteroaryl, OH, halogen, CN etc, A^1 is selected from $(-CR^8R^9-)_n$, optionally substituted cycloalkylene and a combination of these groups, X is selected from COOM and groups which can be converted into COOM, A^2 is $(-CR^{10}R^{11})_m$, where R^{10} and R^{11} are independently selected from H, alkyl and halogen and Z is selected from Y_3C-O- , $Y_2C=CR^{15}-$, where R^{15} is selected from H, alkyl or halogen. Ognyanov et al also disclose the synthesis of many compounds, one of which is identical to instantly claimed compound (see compound B12, column 52, which corresponds to example 1, S-27a, that may be useful for treating disease such as epilepsy), having similar utility such as, those compounds are useful for the treatment of neurological and neuro-psychiatric disorders, which reads on the instant claims.

Ognyanov et al is cited to show the state of the art.
